

# TE-PRO LIFT™

- The **TE-PRO LIFT™** is mounted mid-blade and protects from the wear and tear of the lashing straps during lifting of the blade.
- Produced by composite molding solid and foam elastomers together, the **TE-PRO LIFT™** ensures low weight for easy installation and handling.
- Being produced only by elastomers materials, the TE Protector does not corrode in any environment.
- The polyurethane materials ensure resilience against abrasion, and is also very flexible.
- An incorporated feature of the **TE-PRO LIFT™** is the lashing stops, which keeps the straps in place and won't break off.

Item number  
75521699-0328

Item number  
75521699-0369

## Features include:

- Low weight for easy handling and installation
- High durability
- Non-malleable
- Adapts to blade profile

Dimension:	Value:
Height:	98 mm
Length:	1050 mm
Width:	850 mm
Foam:	50 mm
Weight:	10/15 kg.

- The **TE-PRO LIFT™** passes The Danish Working Environment Authority's guidelines for both manually lifting and carrying away from the body.

## FURTHER OPTIONS:

- Complete traceability with production date and lot number can be applied upon request.
- Integrated mounts for taglines during blade assembly hoist; Ø8 carabiner.

# STRONG PARTNERSHIP

We are a strong partner for your business. With a solid technical understanding, extensive experience and danish production facilities, we provide rubber and polyurethane solutions to suit your needs.

GREAT FLEXIBILITY

LONG HERITAGE

DEEP KNOWLEDGE

ENGAGED EMPLOYEES

# DEVELOPING TOGETHER

Together we create the right solution for your business in industrial rubber and polyurethane – from planning to finished product.

IDEA DEVELOPMENT
